bigfish® FOLDING BIKE

Bigfish folding bikes were born out of a desire to improve everyday living via innovative, affordable, high performing folding bikes.

That's why the bikes had to be simple to fold, easy to manoeuvre and great to ride.

A SIMPLE SOLUTION FOR YOUR DAILY COMMUTE AND YOUR WEEKEND GETAWAY

We have recently introduced a new generation of bikes, the Bigfish Line, a stunning companion to the Bigfish Wave. We've taken folding simplicity and simplified it further.

Specifically designed to give you the freedom to do more and see more, to overcome the stresses of modern living, Bigfish will become an indispensible part of your life. Beat the traffic, save time, save money, and get some exercise every day on your daily commute.

A SIMPLE SOLUTION FOR URBAN LIVING

Bigfish is designed to commute freely across the urban landscape, to be stored in small spaces upon arrival and then taken out again and explore new horizons.

Its unique features include the ease of fold, the ability to wheel it when folded, and a responsive, ergonomic and enjoyable ride that makes it ideal for urban living.

ALWAYS MOBILE, EVEN WHEN FOLDED

Bigfish is designed to be mobile even when folded as you can actually wheel the folded bike along with you as you walk.

Think how easy that makes negotiating the crowded station platform!

EASY DOES IT

We believe that folding your bike should be as quick and easy as getting your travel pass out of your pocket.

Bigfish's new button-fast folding system gives you speed, simplicity and cleanliness.

Four simple steps and you're ready for action.

COMFORTABLE AS A CITYBIKE PRACTICAL AS A FOLDING BIKE

Bigfish gives you a comfortable and upright riding position that affords you a clear, open view of the road ahead. This is what we call »citybike geometry«. Position the Bigfish next to a conventional bike and you'll see that the key proportions match up.

Bigfish has the pedalling efficiency of a conventional bike, meaning that you can travel just as fast, and with the same amount of effort, thanks to its full-size geometry, transmissions and highly responsive 16inch wheels.

STORE IT INSIDE, LEAVE STRESS OUTSIDE

Safely stored in your apartment, office or car, Bigfish keeps bike thieves empty-handed and saves you the heartache and cost of replacing your bike.

SPACE-SAVING STORAGE

Bigfish folds up nice and slim. Neither cumbersome nor cubic, it's designed to sit out of the way, unobtrusive and tidy in your living space.

It also has a miniscule footprint for the train or lift, so you can hold it close to your body as if it were part of you.

READY WHEN YOU ARE

Bigfish is small enough to keep in even the smallest of cars, ready for that little adventure whenever you need it.

Getting close to nature, visiting new cities or camping, you can see so much more by bike. Join the masses of people rediscovering the joys of cycling, and make Bigfish an essential part of your daily commute in combination with the bus, train or car.

BIGFISH LINE

From one angle it's straight and contemporary, from another it winds, weaves and mesmerises.

BIGFISH LINE FACTS:
